

Once you have signed up for Nixle, you need to go onto the Nixle.com website to add your preferences. Please see screen shots below:

From the home screen, choose the **Settings** tab, from there you can select if you want phone, email and/or test alerts. Just click on the blue arrow button under 'SMS msgs to mobile' to customize which type of messages you wish to receive:

You can choose to have:

1. **Alerts** - Emergency notifications and critical alerts, such as gas leaks and severe weather.
2. **Advisories** – Are intended to provide important, need-to-know information that is less urgent than an Alert, such as road closures and traffic notices.
3. **Community** – Everyday local news, happenings and developments. These are non-critical information such as town events and town meetings.
